The town contains two substantial banks, an excellent telephone system with connections all over the neighboring counties; post office, telegraph and express offices; several private boarding houses, four hotels; plenty of grocery, dry goods, drug and other stores to supply all demands of the trade; machine, automobile, wagon and boat shops; ice factory, bottling works, eigar facand job printing office, bakery, restaurants, a town hall; flourishing lodges of Masons, Woodmen of the World, Red Men, Maccabees, Eastern Star, Woodman's Circle, and Women's Benefit Association of the Maccabees; a plant for

large shipments of fish on ice are made almost daily during the fishing seasons. The bulk of the fish shipped are mullet, but many pompano, Spanish mackerel, bass, trout, sheep-head, snapper and other fine food fish are shipped. The oyster business is small.

Next to fishing, the cultivation of fancy pineapples engages most attention, as the profits of this industry often reach \$500 an acre. It requires about \$1,500 to properly prepare and plant an acre in pineapples, but after this,\$200 a year would cover the cost of cultivatioin. The plants bear in twelve to eighteen months after planting, and continue to bear annually thereafter without replanting for five or six years.

Truck farming is an industry yet in its infancy and offering good returns on intelligent and well directed efforts. Profitable and easy crops to raise are sweet potatoes, Irish potatoes and sugar cane, which pay \$150 to \$300 per

Prices of town lots and of lands out of town vary so greatly that it is impracticable to give quotations here, but almost any one who does not expect to find in a new and sparsely settled country like this, the improvements and conveniences of Ohio and Massachusetts, can find here something to suit him in price and character, whether he wishes improved or unimproved property.

The town government consists of a mayor, marshal, five aldermen, clerk, collector and assessor, and a treasurer. The chief streets are being paved with asphalt and miles of public roads leading into town are hard-surfaced. The construction of a system of improved highways in a special bonded road and bridge district of which Punta Gorda is the center is now under way and involves the expenditure of \$200,000. More than eleven miles of cement | why they are going to be married sidewalks are being constructed. Boston Transcript.

### Perpetuation of National Life Depends Upon Righteousness

By PHILANDER C. KNOX, Former Secretary of State

IE never must forget that with us war is not the end of our existence, but is a mere means to protect and insure it. Art, science and invention must be primarily the handmaids of peace, not of war; THEY MUST PRO-VIDE US FIRST WITH JOY, NOT SORROW; THEY MUST SAVE LIFE, NOT DESTROY IT.

But prepared we must be to defend our homes and our liberties. Let us remember that for a nation the dangers of peace may be worse than the dangers of war and that, while war is the function of the government, PERPETUATION OF NATIONAL LIFE DEPENDS UPON THE VIGILANCE, PA-TRIOTISM AND RIGHTEOUS-NESS OF THE PEOPLE.

## Barring Out the Wolves.

Every Siberian village is surrounded by a big stockade some ten or fifteen feet in height. This erection is to prevent the sheep and cattle from wandering into the forests and so falling a prey to the wild animals which swarm therein. In addition to this, each village makes common property of an enormous number of dogs of the wolfhound breed, which are kept for protection from the packs of wolves which in winter, desperate with hunger, descend upon the villages. Such dogs are rightly prized and, though they belong to nebody in particular, are kept well fed and cared for. They are huge beasts, almost as savage as wolves them-
